About Me

Self-taught Frontend Developer skilled in Next.js, React, TypeScript, JavaScript, HTML, CSS, and MongoDB. Started coding in high school and focused on building modern, responsive web applications while improving problem-solving skills through real-world projects.

Currently learning backend fundamentals to better understand complete systems and improve debugging and architecture skills.

Skills

- Next.js
- React
- TypeScript
- JavaScript (ES6+)
- HTML5 & CSS3
- Tailwind CSS
- Framer Motion
- Zustand
- MongoDB
- Git & GitHub
- Responsive Design

Projects

E-Commerce Application

Next.js • TypeScript • Tailwind CSS

Built a responsive e-commerce web application with reusable UI components, dynamic routing, and modern layouts. Recreated and studied UI patterns inspired by Jumia and Naivas to improve understanding of frontend architecture and user experience design.

Live Demo: [GitHub Project](#)

Developer Portfolio

Next.js • Tailwind CSS • Framer Motion

Designed and developed a modern portfolio website featuring animations, responsive layouts, dark mode support, and interactive UI experiences.

Live Demo: [glen-barasa.vercel.app](#)

Education

Self-Taught Software Development (2021 – Present)

Learning through documentation, online courses, and continuous project building with a strong focus on modern frontend development and system understanding.

Kangundo High School (2021 – 2025)
